

IL

CORPO UMANO

L'

uomo

ha

lo

scheletro

è

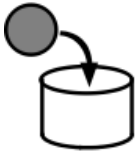

un

1

vertebrato

Mette

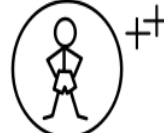

al

mondo

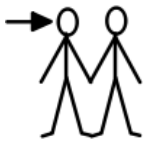

figli

e

li

allatta

quindi

è

un

1

mammifero

Ha

una

temperatura

del

corpo

costante

quindi

ha

il

sangue

freddo

Ha

una

dentatura

completa

e

sviluppata

è

un

1

onnivoro

Può

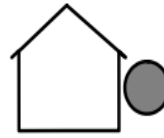

vivere

soltanto

fuori

dall'

acqua

respira

per

mezzo

1/2

dei

polmoni

Si

distingue

dagli

altri

perchè

è

dotato

di

intelligenza

L'

uomo

assomiglia

molto

ad

animali

che

hanno

un

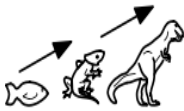

cervello

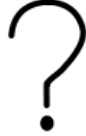

molto

sviluppato

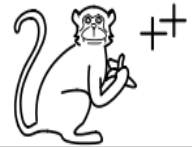

come

le

scimmie

Il

corpo

dell'

uomo

è

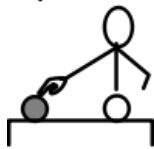

diverso

da

quello

di

ogni

altro

animale

perchè

è

l'

unico

ad

avere

gli

arti

il

bacino

e

la

colonna vertebrale

disposti

in

modo

tale

da

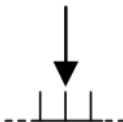

permettere

la

posizione

eretta

Il

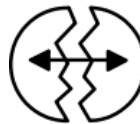

corpo umano

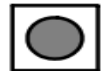

è

diviso

in

tre

3

parti

LA

TESTA

formata

da

faccia

e

cranio

che

con

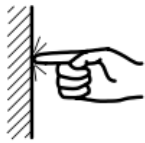

la

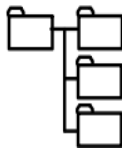

sua

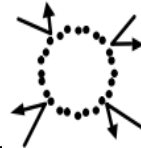

solida

struttura

protegge

il

cervello

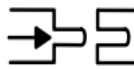

IL

TRONCO

attaccato

alla

testa

per

mezzo

del

collo

Si

suddivide

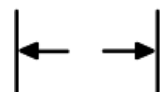

in

due

ampie

cavità

il

torace

e

l'

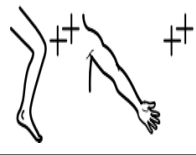

addome

GLI

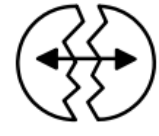

ARTI

si

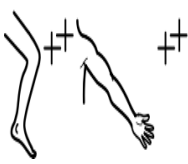

dividono

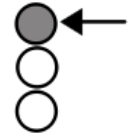

in

arti

superiori

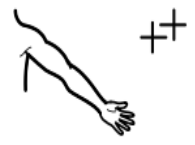

cioè

le

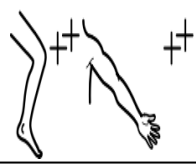

braccia

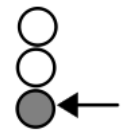

e

arti

inferiori

cioè

le

gambe

All'

interno

del

corpo

vi

sono

i

vasi sanguinei

e

gli

apparati

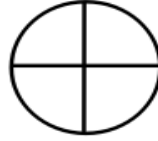

che

svolgono

tutte

le

funzioni

che

ci

permettono

di

vivere

e

di

crescere
